

HEADSTRONG STEEL STUDIO

MECHANICAL EFFECTS & TECHNOLOGY

ABOUT US

We are a diverse company focusing on creativity and simplicity to solve complex problems through structural fabrications, art installations, furniture decor and functional artistic security features.

Steel is our main medium.
We believe in the constant of change and adapt ourselves to the ever learning process it requires with the dedication it deserves.

BASE METALS

HOT ROLLED STEEL

Hot Rolled Steel is distinguished by its inherent blue mill scale. This mill scale is what makes Hot Rolled Steel unique and gives it its "Industrial" look. We add an acid patina to our Hot Rolled to enhance these qualities.

COLD ROLLED STEEL

Cold Rolled Steel does not have blue mill scale. This is a clean steel that allows us to use a variety of acid patinas to create an array of colors and patterns.

STAINLESS STEEL

Stainless Steel has low carbon content and is extremely rust resistant. This steel can be patina'd different shades of light to dark charcoal color.
